Createspace, United States, 2013. Paperback. Book Condition: New. Alan R Holyoak (illustrator). Lab Manual. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.This laboratory manual supports a one-semester introductory course in ichthyology. It includes exercises in which students use dichotomous keys, carry out basic phylogenetic analysis, and learn comparative anatomy of jawless, cartilaginous, and bony fishes. This laboratory manual grew out of a set of exercises I developed over my years of teaching ichthyology. I developed them originally because there was no laboratory manual available that provided my students with the kinds of hands-on laboratory experiences I want them to have. I also wrote it because I empathize with the plight of university science students who are constantly faced with what I consider to be exorbitant textbook prices. This is my attempt to provide them a useful, affordable laboratory manual on the biology of fishes. The exercises in this manual can help students hone their skills as scientific observers and thinkers. These exercises can help them come to view fishes in new and interesting ways. After all, it s not what we know about animals but how we think about them that truly matters. Addendum: I noticed a glaring typo on p. 23 in Table 3.2. The cell in the character matrix for the Character Jaw and the Taxon Petromyzontidae (lamprey) should contain a 0 instead of 2.1 Sorry about that! -- ARH.
